Marked-up Copy of Amended Claims in accordance with 37 C.F.R. 1,121(c)(1)(ii)

- (Once Amended) Switching device according to Claime 2-or-3Claim 2, characterized
 in that it also comprises, associated with each electrode (20), at least one stopper
 (18) serving as a stop for the beam and for the purpose of preventing it coming into
 contact with said beam.
- (Once Amended) Switching device according to Claims 4 or 5Claim 4, characterized in that it comprises a plurality of stoppers (24) distributed along the length of said electrodes.
- (Once Amended) Switching device according to ene of the slaims 1-to 8Claim 6, characterized in that the side walls of the moving structure, stoppers and electrodes are coated with a diamond layer.
- (Once Amended) Switching device according to one of the claims 1 to 8Claim 1, characterized in that it is made on a substrate (10).
- (Once Amended) Switching device according to Claims 2 to 13Claim 2, characterized in that said beam (14) presents a 'T' shaped section.
- (Once Amended) Switching device according to Glaims 1-to-14Claim 1, in which
 each electrode (20) is connected to a conductor linked to a control circuit,
 characterized in that the electrode connection with the above-mentioned conductor
 comprises a fuse (42).
